# MANIFESTO

For 200 years, authenticity, passion and commitment have been the values at the core of de Buyer's business, knowledge and expertise.

We design and manufacture utensils, continuously innovating to precisely meet the needs of both catering professionals and home cooks.

Like all lovers of good food, we have a passion for tasty and nutritious cuisine. In contrast with today's culture of instant gratification and ready meals, we want to help each individual to achieve fulfilment by taking back control of their diet. We support a concept of cooking that requires time and effort.

Awarded a 'Living Heritage Company' label by the French state, we continue to maintain our artisanal spirit and our passion for precise, high-quality work carried out with care. We campaign for responsible and educated consumption: our products are made to last!

We promote environmentally friendly manufacturing processes that protect the beautiful Vosges area. We are the first culinary-sector business in France to receive a 'confirmed level of CRS commitment' label from AFNOR, notably for the care taken to ensure the well-being of our employees.

Dedicated to upholding our values and mastering our trade, our products, actions and individual expertise help breathe additional life and soul into the cooking process. After all:

'Every recipe holds a secret'

'Chaque recette a son secret'

Since 1830, we have been preserving production practices handed down through generations. Nurturing values such as humility, respect, and fairness, seasoned with a pinch of innovation. Like the chefs, we carefully measure out these ingredients until we achieve the perfect blend. Prepare your taste buds as we reveal some of our biggest secrets. Feast your eyes and enjoy!  
Thank you for your ongoing loyalty.

Yours sincerely,

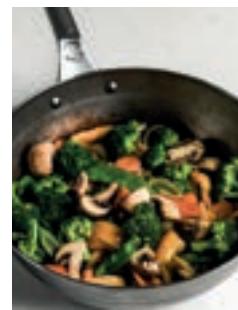

A handwritten signature in black ink that reads "Guilhem Pinault".

Guilhem Pinault

By agreeing to those terms, you accept NOT to sell de Buyer products on any marketplace including, but not limited to, Amazon and NOT to distribute de Buyer products to marketplace resellers except if accepted in writing by a de Buyer Inc. authorized representative. For details or to receive a copy of our General Conditions of Sale, Damage & Return, please email us at sales@debuyer.com. Prices are subject to change without notice.

# COPPER

---

Copper cookware is essential for the serious chef. Copper heats and cools within seconds and its excellent conductivity ensures quick and even heat distribution throughout the whole pan, a must-have for delicate preparations such as sauces and reductions in the French style. These handcrafted pots and pans blend versatility and usability with the high-quality materials that professional chefs love. Our distinctive blend of 90% copper and 10% stainless-steel ensures your copper pot truly lives up to its name. Imagine bringing the excellence of professional cooking right into your kitchen.

Our copper and stainless-steel lines marry quality with convivence. The copper outside the pan conducts exceptional heat distribution, ensuring dinner is cooked to perfection. The stainless-steel interior allows for easy care and quick clean-up and guarantees durability while protecting your food from the elements of copper. Our copper pans are an investment that will withstand years' worth of delicious meals and entertaining.

Our crème de la crème Prima Matera line features induction cooking capacities. These heavy-duty pans are 90% hand-polished copper and 10% stainless-steel and feature riveted ergonomic cast stainless-steel handles for effortless movement. What makes the Prima Matera line distinct is our innovative ferro-magnetic bottom, primed for induction cooking or any cooking surface.

Induction cooking is a more energy efficient method of cooking that allows food to quickly and evenly heat to precision. Prima Matera's innovative technology combined with it's beautiful aesthetic makes crafting expert food at home attainable.

Inocuivre will transform your kitchen and all that you cook with the elegant, time-honored tradition of copper cookware. Inocuivre pots and pans are easy to use, with a substantial feel and durable material that is made to last. Unique features include cast-iron or brass handles riveted by hand, a gorgeous copper exterior, a stainless-steel interior, professional-grade depth and height, and a sleek design. As with the Prima Matera pans, Inocuivre pans are made almost entirely of copper, a rich distinction that promises effective and uniform heat distribution.

To retain the brilliance of your copper pan, use a copper cleaner in place of harsher detergent and never use a metal sponge to clean. To clean the stainless-steel interior, use a sponge and mild soap. For stuck or burned food, allow the pan to soak in warm soapy water. Cleaning in a dishwasher is never recommended.

# CARBON STEEL

---

At de Buyer, we value tradition and history, carrying the past into today. Our family company has handcrafted cookware made to last since 1830. Our signature pans crafted from carbon steel also promise to stand the test of time, improve as they age, and become your most essential items. With time, carbon steel pans reflect the sensibilities of their users through the seasoning process. Our pans progress as you do, and the end results are one-of-a-kind pieces that reflect back your journey in the kitchen.

Like cast iron, carbon steel is made of carbon and iron. The difference is in the ratio: carbon steel is made of 99 parts iron to 1 part carbon. The result is a lighter, less porous pan that warms quickly and evenly. Carbon steel retains its heat to envelope your meal at the perfect temperature.

Carbon steel's story begins with an initial seasoning. Simply wash your new pan with warm water and dry with a soft towel. Then, pour in a quarter-inch layer of your favorite cooking oil, selecting one with a high smoke point. Heat to smoking before pouring out any remaining oil and wiping dry. Your new pan is now seasoned and ready for use.

Your initial investment in carbon steel pays off, and the film creates a natural, professional-grade nonstick surface. The more you use it, the darker it gets, telling you that your pan is on its way to true excellence. Your pan rewards you for your efforts over time, and as you season your pan, it becomes more nonstick and easier to clean. Just deglaze your pan with water after use and wipe it with a clean, soap-free sponge.

We offer two lines of carbon steel cookware, Mineral B and Blue Steel, so that chefs can select the pan that serves them best. Each has its unique advantages, allowing chefs to mix and match between lines to create a complete set of cookware.

## Mineral B

Our Mineral B line arrives protected by beeswax, ensuring your investment arrives rust free. de Buyer always refines with an eye toward the natural world: we discovered that beeswax protects pans against oxidation and improves seasoned steel. Our special application methods ensure that wax will not drip or pool, making it mess free. Mineral B contains PFOA-free iron that undergoes environmentally safe production methods.

Mineral B allows you to sear, stir, brown, and grill at high temperatures, both on the stove and in the oven. The line includes woks, egg pans, crepe pans, and more, each with our distinctive steel and wax. The line includes different sizes, so that you can always find the best item for you.

Mineral B pans reflect our French roots: the Lyonnaise shape and curved handle «à la Française» are symbols of French gastronomy.

Lifetime warranty.

# MINERAL B BOIS

Our new B Bois line marries our beloved staples for cookware and utensils with a fresh take on design that will please contemporary chefs. To suit the modern kitchen, B Bois products mix functionality with style to compliment wooden countertops, butcher's blocks, or wooden cutting boards. Our high-grade beechwood will also reflect nicely the natural qualities of granite, marble, or tile, elevating every kitchen's aesthetic. Create the kitchen of your dreams down to the last detail using these beautiful pieces as inspiration for a timeless, elegant design.

As with everything we make, we produce our B Bois line holding ourselves to the highest standards for quality and ethical practice. We want to make your kitchen beautiful while also preserving the beauty of the world from which we source our materials. For B Bois, we collect beechwood from sustainably managed forests to ensure that our eco-footprint is minimal. We treat our wood with natural beeswax so that it won't crack or warp. You can rest easy knowing that every B Bois spoon or pan that touches your food is safe and naturally treated.

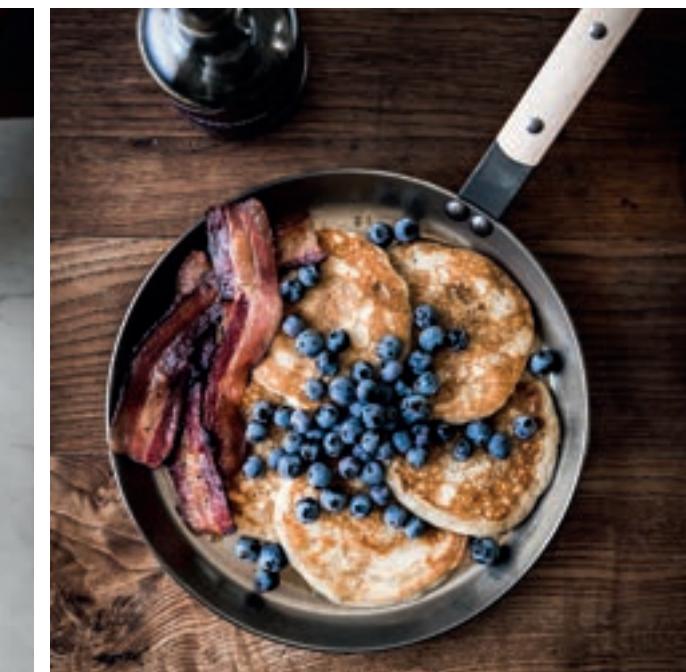

de Buyer products are created with function in mind, and we aim to make your cooking experience seamless. The bodies of our pans are rendered from carbon steel. Steel is essential for high-temperature cooking, such as sealing in the juices of your steak or stir-frying fresh vegetables.

The beechwood handles provide a good grip and protects your hand from directly touching heat. Safety is always a top priority for de Buyer.

In designing our line, we have thought of everything to meet any kitchen task. From our carbon steel collection, we offer Mineral B Bois, the all-natural PFOA-free carbon steel.

Utensils B Bois features spoons, spatulas, and more in a mix of steel and wood, or in an all-wood variety. We offer a range of shapes and sizes, all at an accessible price point.

Take for instance our B Bois slotted spatula: stonewashed stainless-steel ensures that your utensil withstands high temperatures. The beechwood handle provides chefs with a firm grip that remains cool to the touch. The elegant look means that you can use your utensil for cooking your meal in the kitchen and then serving it to guests in the dining room. Pair the spatula with our B Bois frysans to flip the perfect omelet or sear salmon in style.

# BLUE STEEL

---

Invite the professional kitchen into your home with our Blue Steel pans. Blue Steel provides the beginning chef the experience of working with approachable, expert-level cookware. Our pans are made from sturdy steel, which heats quickly and evenly allowing you to whip up weeknight meals such as sirloin steak and seasoned potatoes or chicken Milanese. Blue steel is a responsive material, so you can use the same pan to brown your meat, sauté your vegetables, and deglaze your pan with red wine for a pan sauce, all in time for dinner.

To craft Blue Steel, we begin with carbon steel treated at higher temperatures. The heat treatment gives the pan its distinctive dark color and allows for a lighter, thinner pan. We selected blue steel as the base for our pan because of its exceptional strength. The steel is between 1 and 2 mm, the ideal thickness for everyday cooking. We secure solidly constructed, welded handles to these pans so that they will stand up to frequent use and deliver the consistent results you expect from de Buyer.

We offer a La Lyonnaise Blue Steel frypan and a crepe or tortilla pan to make sure that weeknight recipes are within reach. de Buyer delivers these benefits at a reasonable price point, so that you don't have to sacrifice quality for accessibility. We also offer neoprene handle gloves to ensure that you stay safe in the kitchen as you deliver delicious meals to the dining table, time after time.

# NONSTICK CHOC

A nonstick pan is a must-have essential in any kitchen. We craft our distinctive nonstick series, Choc, out of pressed aluminum with a five-layer coating. These pans, including their rivets, are made from heavy-duty aluminum. The result is a pan that is less susceptible to warping and creates the perfect environment for cooking delicate fish or simmering a favorite sauce. Other notable qualities include superior scratch resistance and a guaranteed PFOA-free product, making the pans perfect to keep on hand for your best meals.

The color-handle series follows HACCP certification and makes a bright addition to your stove top. These pans are versatile and fit just about any occasion. A Choc pan will without a doubt quickly become your go-to all week long, from reheating Sunday dinner on Monday, to braising codfish on Wednesday, to whipping up curry lentil stew for Friday's lunch.

In addition to the indispensable HACCP series, de Buyer offers the Choc Resto Induction, a nonstick pan with a honeycomb-coated forged induction base. Like the HACCP series, these pans are also available in 4 or 5 mm thicknesses, ideal for heat resistance and regulating temperature. The honeycomb base perfects heat diffusion and retention, which means your pan can be used on any heat source without fail.

Nonstick pans do not reach high temperatures because the nonstick coating acts as a barrier between the heat source and the pan, which is why our Choc line is so ideal for simmering, reheating, or cooking delicate foods at a medium to low heat. For best results, gradually heat the pan to your desired temperature (250°C/482°F max) and do not leave an empty nonstick on a hotplate or any heat source. Wooden or soft utensils are preferable to keep your pan pristine, and cleaning is made simple with a soft sponge and mild soap.

# CHOC INTENSE

Our Choc Intense line has all the benefits of our HACCP series and excels at delicately cooking food without coloring it. The perfect pan for leftovers, it can reheat pre-cooked dishes, combine sauces and does so without altering taste, color, or flavor. Made of 4mm of forged aluminum, this non-deformable pan allows for gradual and uniform heat distribution ensuring the perfect temperature every time.

The Choc Intense line is also ultra-resistant and reinforced with a matte black structured interior and exterior coating. Guaranteed without PFOA and without particles, it is not only extremely safe but also durable for long-term use. Because of its high resistance to abrasion and optimal slipperiness, this pan has a 50% longer lifespan than your average non-stick and will stick around in your kitchen for many years to come.

# MANDOLINE

---

As any restaurateur knows, a mandoline is an essential kitchen tool because it allows complex dishes to be created quickly and efficiently. A gratin can be ready in minutes. A batch of homemade potato chips will bake crisply and evenly. Julienne carrots will roast in uniform perfection. With our mandoline slicer, consistently cooked food is possible so you can wow your guests and still have time to enjoy the dinner party.

## La Mandoline Revolution

La Mandoline Revolution arrives in your kitchen with a plastic receptacle for easy storage of your julienne blades. It offers an ergonomic round stainless-steel pusher with a rotating control system for easy and regular cuts. You'll find a double horizontal blades with micro-serrated sides as well as three julienne blades, a feature sure to add variety and depth to your dish. La Mandoline Revolution also features an integrated, patented DICE system.

Designed with your safety in mind, all mandolines feature an ergonomic pusher keeping your fingers away from the blade and a rotation control system to maximize precision. Each of our three lines are made of professional stainless-steel blades, are easy to clean, and take up minimal space with their compact design and/or folding foot. Safe and versatile, our mandoline slicers are a staple item every kitchen requires.

## La Mandoline Revolution Master

This mandoline offers six blades ranging from 2 mm to 10 mm and an extra pusher for long vegetables such as zucchini, cucumbers, and carrots.

## KOBRA Slicer

The KOBRA mandoline allows for the easiest sliced cuts. The v-shaped blade is perfect for cutting even the softest of fruits. With the new thickness adjustment setting, you can adjust the knob setting for desired thickness quickly, safely and efficiently allowing to cut extra-fine slices .2mm to 5mm. It features a professional quality blade made in Thiers with a "click express" system so you always ensure the perfect slice.

### The KOBRA blade easily cuts the product.

Micro-serrations of the blade make it easier to cut all fruit/vegetables into very thin slices, while preserving the constitution of their flesh. The stainless steel plate enables food to slide smoothly for a natural movement. With a 19.3° optimised cutting angle and an ergonomic handle for a natural grip as well as anti-slip handle and legs, it cuts fruits and vegetables like a dream.

## KOMI Slicer

The KOMI Japanese mini slicer is a user friendly and ultra compact vegetable cutter with an integrated horizontal blade. Easily adjustable for different thicknesses from 0.5mm. This smaller version of our larger Mandolines has extraordinary capabilities. For making various sized slices as well as exceptionally julienning vegetables and fruit, this mini slicer is the perfect addition to any kitchen.

Like all our Mandolines, the KOMI comes with an ergonomic protective plunger. The transparency provides an added layer of safety so you can see exactly the placement of the plunger on the slicer. The compact usage and storage of this product makes it a kitchen favorite that can be used by amateurs or professionals.

# CORER

Take on baking and cooking projects effortlessly using our Universal Core Concept. Even the most delicate fruits and vegetables yield to our distinctive coring system. de Buyer has refined our signature line to preserve the texture and integrity of the food, ensuring your meal is elevated and impressive.

The handmade stainless-steel coring tube offers a sharp, serrated bottom blade that promises the clean extraction of fruit and vegetable tops, tails, and stalks. Because our device works so effectively, the Universal Core Concept makes it possible to stuff even very ripe fruits and vegetables. Each summer, fill perfectly cored vine-ripened tomatoes with ground beef, garlic, spices, and herbs and bake to savory perfection. In the fall, core apples quickly before combining with cinnamon and nutmeg for a fragrant apple pie.

The corer's Soft Touch handle is non-slip and ergonomic to allow chefs a safe, comfortable grip as they make quick work of baskets of tomatoes, strawberries, or apples. Our handles are made with polypropylene coated with TPE and are made to endure use and cleaning. Paired with our blade, you can easily pull out even the cores of hard, dense, or thick-skinned vegetables and fruits. To keep things simple, you can place the corer in the dishwasher without worry, knowing that your corer will maintain its sharpness.

Universal Core Concept comes in three sizes to fit the needs of any chef or recipe. Each size is distinctively colored in a cheerful hue to make for easy differentiation and to add a touch of brightness in the kitchen as you create unforgettable cuisine.

# BAKEWARE

A chef's baking drawer is their tool chest. One must have the exact tools needed for each step of every recipe. Put together a complete set with de Buyer's comprehensive line of artisan bakeware. We've thought of everything in handcrafting a wide range of tools that will serve you through whipping eggs for meringue, scraping each drop of cake batter from the bowl, and adding a final touch of whipped cream to a parfait.

Attention to detail is where we excel. de Buyer crafts each piece with you in mind, infusing your time in the kitchen with ease and enjoyment. In creating bakeware, we consider how our utensils will fit and feel in your hand, how our tools can produce optimal results, and how to make clean-up simple. de Buyer designs with integrity: our bakeware is destined to become your family's heirlooms, passed on to bakers for generations to come.

Take, for example, Universal Whisk Göma: we've re-envisioned the whisk to provide you with an essential utensil that will last. We build our whisk with stainless-steel wires that always spring back and never break or loosen. Our isolating handle allows you to mix up emulsions and sauces in a breeze, or whip cream as light as air. Holding Universal Whisk Göma is an act filled with pleasure, as its ergonomic, anti-slip handle molds to the chef's grip.

For a thoughtful gift, send someone the Kit Macaron. Bakers will be delighted to receive everything they need to create memorable macarons, down to a silicone mat specially marked with perfectly sized piping guides. From copper-fluted molds, to durable double boilers, to steel piston funnels, our entire bakeware line to serve your every needs. We deliver the habits and traditions of our rich culinary history to your home, one baking tool at a time.

# BAKING BUNDLES

Our bread and tart making boxes are designed with the savvy chef in mind. Filled with products that will help you achieve optimal pastries and breads, we only put the best of the best in these boxes.

The bread baking box comes with the perfect items for homemade bread making, including a double baguette tray, a bread pan, a dough scraper and a bread lame for scoring your bread. You'll have the most perfect French baguettes and banana breads using this box.

The tart making box was made for pastry lovers who value the art of their craft or people who need a place to start on their pastry making journey. Ideal for making and setting perfect tart crusts, the tart box contains a high-sided fluted and perforated tart rings, steel pie pan, a round stainless steel grate with feet for cooling, and a tart server with a beech wood handle and a beeswax finish. We package these boxes in eco-friendly packaging for the final touch and provide you with advice from international chef's to ensure your bread and tart baking journey goes smoothly.

# PERFORATED PASTRY MOLDS

Channel the enduring tradition of Valrhona chocolate with our stainless-steel tart rings. We created our re-envisioned baking ware in partnership with the famed pastry school “l’Ecole du Grand Chocolat VALRHONA” to bring the baking traditions of French masters into kitchens around the world. Expert craftsmanship and ease of use will delight professionals and beginners alike.

Each tart ring begins from metal that is cut, bent, and welded by hand in France. Supple stainless-steel will survive generations worth of baking. Each ring is perfectly finished: our artisans ensure aligned sides without an offset where welded. High-grade materials result in rings that always maintain their original shape after countless baking tasks and are dishwasher-, refrigerator-, and freezer-safe.

A wide variety of shapes and sizes allows you to dream up endless culinary creations. Round rings are ideal for tarts, tartlets, cakes, and quiches, while our charming heart shape celebrates love and romance. A classic oval conveys elegance, and each shape comes in a broad range of sizes to fit any whim or occasion.

# PASTRY MOLDS

NEW

Pastry heaven! Using quality, safe molds in your desserts is as important of a step as following a recipe. Coated in iron, our pastry molds are meant to last. Each mold may allow you to make a special dessert or pastry, ranging from square and round cake pans to bread pans, muffin molds and madeline molds. Used for so many different things, these molds provide excellent baking results thanks to the iron coating.

The molds can reach high temperatures, enabling juices and recipes to brown, crisp and caramelize. The iron also helps with heat conductivity and ensure even diffusion of heat for a uniform bake.

These molds are all nonstick with a PFOA-free coating for easy mold release and protection against oxidation. These molds are easy to use and to clean. Washing by hand is the best way to keep these molds in their best shape. For traditional oven use up to 430°F, not suitable in microwave or air fryer.

# SILICONE

## Silicone Molds

For whatever it is that you dream of baking, de Buyer provides an ideally suited silicone mold that will ensure delectable, picture-perfect results. de Buyer offers two distinct lines of molds, Elastomoule and Moul'flex, each with a plethora of shapes and sizes to accommodate any baker's fantasy. Both lines use high-quality silicone to ensure that even the most intricate baked goods will come out cleanly, and results will be always be evenly cooked.

### Elastomoule

Boasting a patented system for heat transfer, Elastomoule provides optimal caramelization for loafs, muffins, and more. The line provides the natural non-stick surface you desire from silicone, perfectly balancing classic and contemporary culinary techniques.

The secret behind Elastomoule's better browning is its exceptional conductivity, which rivals the caramelization of metal molds. Elastomoule is made of high-quality silicone and metal powder, ensuring cakes and tartlets that are uniformly baked to perfection.

Our one-of-a-kind Elastomoule molds are made for use in a traditional oven or bain-marie. They withstand an impressive range of temperatures, from -90°F to 580°F and are perfect for both freezing and oven cooking. To maintain the mold's smooth surface, wash by hand and avoid using sharp objects on the tray.

### Moul'flex Pro

Our sturdy Moul'flex mold is made to meet every baking need and offers an extremely flexible mold that stands up to the microwave, oven, or bain-marie. Moul'flex is equally suited for hot and cold preparations so that chefs can see their most exciting ideas take shape.

What goes into our mold is just as important to us as what will come out of it. Moul'flex offers ideal hot air circulation through our signature R'System of perforations. Our darkly colored mold absorbs and distributes heat around your pastries for great caramelization. Pure platinum silicone is guaranteed peroxide-free and allows for a smooth inner surface and easy release.

Begin by greasing your mold. Place on a grate or perforated baking sheet for even better air flow. Use at temperatures from -40°F to 580°F, turn out delectable desserts, and then handwash to preserve your mold. As with Elastomoule, avoid using sharp objects on the mold to keep it's surface smooth.

# MILLS

---

Our wooden mills have been handcrafted in France since 1875 using only the finest beechwood cut from sustainably managed forests. For each tree cut in the French countryside, another is planted in its place. That's almost 150 years of beautiful products that embody a respect for the environment and an attention to quality.

The history of crafting quality is the story of de Buyer's mills. Take the Java Series. These all-wood mills are meticulously hand-crafted in France using entirely French materials and labor—from the metal, to the trees, to the very hands at work. The Java Series embodies the attention to craftsmanship that has marked our family company for hundreds of years.

Each mill offers a thoughtful and innovative design, and features stainless-steel or polished steel mechanisms, as well as a sophisticated upper knob to grind to your ideal coarseness. The beechwood is either natural or tinted and later varnished in a range of color selections to fit every kitchen aesthetic. What's more, our steel mechanisms feature a lifetime guarantee against manufacturing defects.

All salt and pepper mills showcase steel mechanisms. de Buyer's salt mills feature a stainless-steel mechanism to protect against corrosion, so that your mill can flavor your food for years to come.

Always rotate the mill top in the same direction for best results. Adjust the knob on the top of the mill according to preference. Simply tighten the knob for a finer grind that yields more spice. Loosen the knob for a more flavor-packed, coarser grind.

These timeless mills are delivered empty and ready to be filled with your favorite salt and pepper.
